Phone call in [Ex. 6 Personal Privacy (PP)] Code [Ex. 6 Personal Privacy (PP)]

Hi All,

Coaltec has reached out to Region 3 again, this time it's the same process but instead of chicken litter it's municipal biosolids. Please see the attached emails for background info.

At this point it's evident that we need more information to make a determination. Nabanita had the following initial questions for the facility:

- 1) Define what "biosolids" are.
- 2) Please provide a description of the process, including a temperature profile.
- 3) The previous project uses excess heat and a thermal oxidizer to sterilize chicken bedding. How is the excess heat being used in this process?

I'd like to use this call to discuss legal/regulatory questions and also to get a set of questions to send to Coaltec. If you have any preliminary questions please let me know before the call.
